

REMARKS

The submission of the Request for Continued Examination filed herewith is in response to the Official Action (Final Rejection) dated April 4, 2001. Claims 26, 27, 29, 32 33, 36, 38-47 have been canceled, without prejudice.

It is believed that the filing of a Request for Continued Examination and new claims is better suited to focus the prosecution of the application.

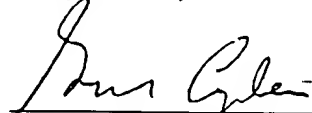

A new set of claims 48-68 is submitted. These claims largely parallel the original claims but have language corrections.

Minor corrections are made to the Specification at page 23, line 15. These are explanatory in nature and do not constitute new matter.

An exhibit is attached which is a diagrammatic representation of one possible arrangement for carrying out the subject matter of the invention. This more graphically explains the invention.

Prompt and favorable action is requested.

Respectfully submitted,

Gordon D. Coplein
